Szar Communications, LLC
5969 Summerhill Drive
Hudsonville, Michigan 49426

To whom it may concern;

Szar Communications came into our company and analyzed and reviewed our Local and Long Distance Services in February 2003. They recommended some changes and assure us, in other areas, we were getting the best services for our needs. The overall reduction of telecom cost for 2003 was 26%, even though we added some better services to assist our efficiencies to grow our business.

Szar Communications organized our inventory of services, kept all of our contracts in order, and outlined the pertinent information to us in simple Service portfolio.

In August of 2004 Aspen Surgical Products, Inc. had out grown our existing facility, so we build our new facility in Caledonia, Michigan. Szar Communications project managed our move for us by meeting with our current phone vendor, ordering, and make sure our local provider implemented our new services, and worked with our ISP to deliver new Internet Services in our new location. They made the move a lot easier on us. They created a project plan and timeframes to meet our move in date. We moved in over a weekend and on Monday morning we were doing business as usual.

In October 2005, Aspen Surgical Products, Inc. acquired a Company out of Michigan and asked Szar Communications to assist in the project management of their telecom services. Szar Communications moved their main numbers and toll free services to point to our operation in Michigan. Szar Communications made sure it was completed on time and billed accurately for our company. It allowed us to focus on other areas where we knew this portion would be completed to our satisfaction.

Szar Communications has been a valued resource to our executives and staff. This is a resource we feel has the expertise to guide us to make good sound business decisions. We now, direct any telecom service provider to call Szar Communications (our Consultant) and if they feel this is a benefit to our company, we will then meet with the telecom service provider. This is our new gatekeeper.

I would recommend this consultative approach from Szar Communications to anyone in business.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ann Erhardt'.
